

Addendum I

Date: March 26, 2025

From: Gary Korneck, Procurement Manager, Metro Bus

Subject: Western Transit Center Project: February 2026 Groundbreaking

It was mentioned during Metro Bus's Western Transit Center project Pre-Proposal meeting on February 26, 2025, that a "groundbreaking" needed to take place by February 2026 as a show of major progress to avoid any amendments to the environmental review process that Metro Bus had already undertaken.

After further discussion with the Federal Transit Administration's Region 5 office, it has been determined that Metro Bus has met all of the current thresholds considered for major progress to this point and that the deadline to "break ground" by February 2026 is no longer required as part of this project.

The only project completion "deadline" in place at this time will be an anticipated opening of the facility by September 2026.
